Art of the Hot Rod Dec 19 2019 The best hot rods are art on four wheels, and this book, a collection of studio photography of the cars produced by the world's top hot-rod builders, is nothing less than a gallery of the best of American hot rodding. Profiling top builders like Pete Chapouris, Roy Brizio, Vern Tardel, Troy Trepanier, and 15 others and featuring studio portraits of their most outstanding custom creations, this book celebrates the uniquely American marriage of mechanical know-how to an inspired sense of style and design. Built from the ground up, pieced together from salvaged parts, rebuilt with classic looks and futuristic technology—these are automotive works of art, as powerful on the page as they are on the street. Through the stunning portraiture of master photographer Peter Harholdt, *Art of the Hot Rod* captures these magnificent creations as never seen before.

The Glitch Feb 01 2021 A fast, funny, deeply hilarious debut--The Glitch is the story of a high-profile, TED Talk-ing, power-posing Silicon Valley CEO and mother of two who has it all under control, until a woman claiming to be a younger version of herself appears, causing a major glitch in her overscheduled, overstaffed, overworked life. Shelley Stone, wife, mother, and CEO of the tech company Conch, is committed to living her most efficient life. She takes her "me time" at 3:30 a.m. on the treadmill, power naps while waiting in line, schedules sex with her husband for when they are already changing clothes, and takes a men's multivitamin because she refuses to participate in her own oppression. But when she meets a young woman also named Shelley Stone who has the same exact scar on her shoulder, Shelley has to wonder: Is she finally buckling under all the pressure? Completely original, brainy, and laugh-out-loud funny, *The Glitch* introduces one of the most memorable characters in recent fiction and offers a riotous look into work, marriage, and motherhood in our absurd world.

BRAZILIAN X CHINESE AUTOMOBILE INDUSTRY: PERSPECTIVE OF GROWTH AND DEVELOPMENT FOR SOUTH AMERICA 2010/2012 May 16 2022

ABSTRACT Since 1992, when the president Derrnando Collor de Melo opened the Brazilian automobile market to the international products, the share of foreign brands in this market has increased. Nowadays, the growth of the members of the BRICS in the international automobile market has become more visible; purchase or in the manufacturing either, the numbers of MERCOSUR are quite relevant, due to the strength of the internal market. Nevertheless, China might be a competitive force due to its industrial development and exportations. This research has searched for further information and the data from the sectors in the Brazilian and Chinese automobile markets and has analyzed the information collected, in order to build a scenario that can be used by the Brazilian and Chinese students and by the firms that work in the sector, as well.

Inside the machine May 04 2021 This book tells the story of the modern car industry from the inside. What is it really like to work for the carmakers – the industrial giants that influence the daily lives of millions? How are mass-production cars really designed, engineered, and manufactured? What does it take to engineer a successful vehicle? The story is told through the author's own journey around the globe – starting as a young graduate engineer working for Nissan in the UK, to working for Nissan in Japan and, finally, for Renault in France as Chief Engineer of its 'halo' sports-car, designed to relaunch the Alpine brand. It tells the behind-the-scenes story of three well-known vehicles, whose development teams were led by the author – the Nissan Qashqai, the Renault ZOE, and the Alpine A110 – revealing some of the fascinating stories of how these vehicles came into being. The book seeks to show the real work that goes on behind the glamour of the Motor Shows and the well-honed corporate press releases – work that is sometimes exciting, but often grindingly difficult.

Virales Marketing in der Automobilindustrie: Die Zukunft der

Kommunikationspolitik? Oct 09 2021 Ziel dieser Arbeit ist es zu untersuchen, ob das virale Marketing in der Automobilindustrie bloß einen temporären Trend darstellt oder sich innerhalb der Rahmenbedingungen der Automobilindustrie als ein wichtiges und nachhaltiges Kommunikationsinstrument etablieren kann. Dazu werden die theoretischen Grundlagen und die Kernelemente des viralen Marketings vorgestellt. Nach der Schaffung eines umfassenden Wissens über das virale Marketing, wird untersucht wie sich die relevanten Rahmenbedingungen der Automobilindustrie auf den Einsatz des viralen Marketings auswirken.

Anschließend wird ein spezifisches Vorgehen bei viralen Kampagnen in der Automobilindustrie abgeleitet. In Bezug auf die zentrale Untersuchungsfrage zeigt sich, dass die Individualisierung des Konsumenten, das hohe produktbezogene Involvement sowie der wettbewerbsintensive und zyklische Markt den Einsatz des viralen Marketings in der Automobilindustrie begünstigen. Der komplexe Kaufentscheidungsprozess und die mangelnde Anwendbarkeit des viralen Marketings im B2B-Bereich stellen enorme Einschränkungen dar, die durch die begünstigenden Rahmenbedingungen nicht kompensiert werden können. Dies führt zur Schlussfolgerung, dass das virale Marketing langfristig eine untergeordnete Rolle als Kommunikationsinstrument in der Automobilindustrie einnehmen wird.

Racing Toward Zero Dec 31 2020 In *Racing Toward Zero*, the authors explore the issues inherent in developing sustainable transportation. They review the types of propulsion systems and vehicle options, discuss low-carbon fuels and alternative energy sources, and examine the role of regulation in curbing emissions. All technologies have an impact on the environment, from internal combustion engine vehicles to battery electric vehicles, fuel cell electric vehicles, and hybrids—there is no silver bullet. The battery electric vehicle may seem the obvious path to a sustainable, carbon-free transportation future, but it's not the only, nor necessarily the best, path forward. The vast majority of vehicles today use the internal combustion engine (ICE), and this is unlikely to change anytime soon. Improving the ICE and its fuels—entering a new ICE age—must be a main route on the road to zero emissions. How do we go green? The future requires a balanced approach to transportation. It's not a matter of choosing between combustion or electrification; it's combustion and electrification. As the authors say, "The future is eclectic." By harnessing the best qualities of both technologies, we will be in the best position to address our transportation future as quickly as possible.

Car-tastrophes Jun 05 2021 Automakers are as prone to turn out clunkers as politicians are to lie. Their cars may be ugly, misconceived, badly built, diabolical to drive, ridiculously thirsty, or just plain unreliable. So which were the worst of the past 20 years?

Who Works at the Hospital? Nov 10 2021 Who Works at the Hospital? is aligned to the Common Core State Standards for English/Language Arts, addressing Literacy.RI.1.5 and Literacy.L.1.1. Doctors and nurses are shown in various scenarios as their roles and what they do is explained. Patients of all kinds with maladies show the importance of going to the hospital to get better. This book should be paired with "Why We Need Hospitals" (9781448890101) from the InfoMax Common Core Readers Program to provide the alternative point of view on the same topic.

Media and the City Jul 18 2022 With the majority of the world's population now living in cities, questions about the cultural and political trajectories of urban societies are increasingly urgent. *Media and the City* explores the global city as the site where these questions become most prominent. As a space of intense communication and difference, the global city forces us to think about the challenges of living in close proximity to each other. Do we really see, hear and understand our neighbours? This engaging book examines the contradictory realities of cosmopolitanization as these emerge in four interfaces: consumption, identity, community and action. Each interface is analysed through a set of juxtapositions to reveal the global city as a site of antagonisms, empathies and co-existing particularities. Timely, interdisciplinary and multi-perspectival, *Media and the City* will be essential reading for students and scholars in media and communications, cultural studies and sociology, and of interest to those concerned with the growing role of the media in changing urban societies.

[T]axing Greenhouse Gases Feb 13 2022 Lex Fullarton takes a closer look at the three pillars of the sustainable development framework known as the Triple Bottom Line (TBL). The concept of the TBL is that for a project to be sustainable it must not simply be profitable in economic terms, but it must also benefit society and enhance the natural environment. In the 21st century, the greatest threat to Earth's natural environment and the population of the planet is the rise of greenhouse gas emissions caused from burning fossil fuel as an energy source. The rise of GHG emissions has resulted in a rise in the ambient air temperature of the Earth's atmosphere and is resulting in a significant change in climatic conditions on Earth. Fullarton scrutinizes the problem of getting industry and governments to understand the significance of creating harmony within the TBL. One of the main problems is that partisan politics tends to fragment the factors of the TBL rather than bring them together. Fullarton takes a strong stand in suggesting that taxation systems, which have traditionally been viewed primarily as a means of raising

government finance, can be effectively applied to influence industrial and consumer attitudes towards transiting away from polluting fossil-fuel energy sources towards non-polluting renewable energy use.

Conceptualizing Iranian Anthropology May 24 2020 During recent years, attempts have been made to move beyond the Eurocentric perspective that characterized the social sciences, especially anthropology, for over 150 years. A debate on the “anthropology of anthropology” was needed, one that would consider other forms of knowledge, modalities of writing, and political and intellectual practices. This volume undertakes that challenge: it is the result of discussions held at the first organized encounter between Iranian, American, and European anthropologists since the Iranian Revolution of 1979. It is considered an important first step in overcoming the dichotomy between “peripheral anthropologies” versus “central anthropologies.” The contributors examine, from a critical perspective, the historical, cultural, and political field in which anthropological research emerged in Iran at the beginning of the twentieth century and in which it continues to develop today.

Internationale Strategische Allianzen in der Automobilindustrie: Die Renault-Nissan Allianz Apr 03 2021 Die Automobilindustrie steht weltweit vor großen Herausforderungen. Ein schwaches Wirtschaftswachstum in vielen Industrieländern, Kapitalmarktkrisen, stagnierende Realeinkommen und verunsicherte Kunden beeinträchtigen die Nachfrage in vielen Industrienationen. Die Sättigung der etablierten Absatzmärkte der Triade, der Markteintritt neuer Automobilhersteller aus den Schwellenländern, strukturelle Überkapazitäten und verkürzte Produktlebenszyklen erhöhen zusätzlich den Kostendruck auf die Automobilunternehmen. Organisationsprojekte zur Unternehmensentwicklung oder -internationalisierung führen zu Fusionen, Aufkäufen oder Strategischen Allianzen mit dem Ziel, die entstehenden Größenvorteile in reale Wettbewerbsvorteile umzuwandeln. Der Inhalt: Grundlagen zu Strategischen Allianzen und der internationalen Automobilindustrie; Herausforderungen und kritische Erfolgsfaktoren von Strategischen Allianzen; Merkmale und Besonderheiten von Strategischen Allianzen in der Automobilindustrie Die Zielgruppen: Dozenten und Studenten mit den Schwerpunkten Automotive Management, strategische Unternehmensführung und International Management sowie Führungskräfte in der Automobilbranche
